## DETAILED ACTION

### ***Allowable Subject Matter***

Claims 1-11 and 13-20 are allowed.

The following is an examiner's statement of reasons for allowance:

Independent claims 1 and 18 require selecting a frame for meta-data extraction when a frame's fitness datum exceeds a greatest fitness datum minus a predetermined margin. Jiang et al. disclose determining a distance between Gaussian Models (*a fitness datum*) and if the distance is less than a predetermined margin, the frame is selected for meta-data extraction. However, this threshold in Jiang et al. is fixed (at e.g., 20). Thus Jiang et al. does not teach or suggest a threshold which is dependent on the greatest fitness datum (*a greatest fitness datum minus a predetermined margin*).

Claim 19 includes subject matter previously indicated as allowable (see Office Action mailed 25 May 2007), and thus is allowable for the same reasons, which are reiterated below:

There is no teaching or suggestion in Jiang et al., Kanevsky et al., Pawlewski et al., or Kittler et al. to set the threshold for selecting a set of frames for classifying to a ratio of between about 1:2 and 1:3. While Jiang et al. disclose selecting a subset of frames for classification, there is no indication that a specific ratio of frames is selected from the sound signal. Rather, the selection is based on whether speech is present or not. Pawlewski et al., Kanevsky et al., and Kittler et al. provide no teaching of selecting a subset of frames for classification.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
